

I am an American citizen with a home phone line and I wish to let the FCC know that I do not wish them to implement any proposal that would lessen Indianas' Telephone Privacey law protections. I believe what is in place now in Indiana is very effect with thwarting unwanted phone solicitations. My home phone is protected by Indianas' Telephone Privacy laws and I am happy with it. I do not wish to be subjected to a sub-standard Federal law which would diminish the protection from unwanted calls which I now enjoy through the Indiana system. Thankyou.
